

SUSIAccess

Smart Access to Embedded Devices

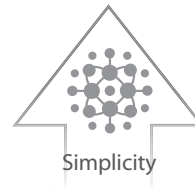

SUSIAccess is an application for System Integrators that centralizes monitoring and managing of embedded devices. By providing a ready-to-use remote access solution, System Integrators can focus more on their own applications, and let SUSIAccess configure the system, monitor their devices' health, and recover any system that may fail.

Benefits to System Integrators

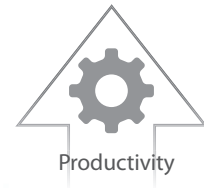

- Lowers complexity for embedded system deployment
- Saves time and resources during system builds
- Increases system reliability
- Decreases after-service cost

Revenue

Simplicity

Productivity

SUSIAccess Highlights:

■ Table View & Graphic View

Displays data in a customized dashboard

■ Auto-Notification & e-mail Warning

Auto notifies errors via warning popups and e-mail alerts

■ Overview of Devices Status

Collects all embedded device data

The Quick Way to Download: <http://www.advantech.com/SUSIAccess/Download>

SUSIAccess Functions

Centralized Device Monitoring

Monitors all device status information including: temperature, voltage, fan speed, and peripherals like SQFlash, 3.5G signal strength, and remaining battery power-information that is essential for reliable administration of the embedded system.

- Devices Status
- Remote Site Layout
- Alarm Notification
- Hardware Log
- Critical Settings
- SQL Server Database

Integrated Remote Configuration

System Integrators can use SUSIAccess to remotely adjust embedded device settings, such as fan speed, voltage, volume and brightness and file transfer.

- Hardware Control
- Brightness Control
- File Transfer
- Capture Screen
- Windows Event Log

One-Click System Recovery

Administrators can remotely set monitoring criteria for warning pop-ups and e-mail notifications, for times when the OS of an embedded device fails to boot up properly or even crashes the system.

- Back-up complete system and files any time
- Restore a system
- Smart back-up saves images to offsite FTP

■ Remote Configuration

Remotely adjust embedded device settings

■ Remote Diagnostics

Analyse screen captures & Windows event logs

■ One-Click Recovery

Back-up/Restore any time
